

Judging Guide 2018

Project Assignment

The first assignment will be which of the three project tracks you will be assigned to. The three tracks are:

- ① **“Access to Care”** with Blue Cross Blue Shield Association
- ② **“Medication Adherence”** with CVS Health
- ③ **“Patient Safety and Quality”** with the Armstrong Institute at Johns Hopkins Medicine

If your background aligns with any of these three areas, you will be assigned to that track. If not, but you are interested in one of the category more than others, let us know that. However, we reserve the right to move judges to make sure that all three categories have enough judges. There will be an opportunity to look at projects outside of your assigned track.

The second assignment will be which teams within the project category you will be judging. This will be determined the day of the event because we will not know how many projects will be presenting until Sunday morning.

Anything Else to Do?

Absolutely. You are free to mentor as well. Ask for the “MedHacks 2017 Mentor Guide” if this interests you. You are also able to attend anything the entire weekend including out opening ceremony to see our two amazing keynote speakers, Dr. Peter Pronovost and Benjamin Jealous, and our closing ceremony to see who the winners are. There will be a full list of possible activities available closer to the date of the event.
