

MEDHACKS

Johns Hopkins Medical Campus | September 8-10

Mentor Guide 2017

Schedule

Mentors are free to come and go as they wish throughout the weekend! Last year we had some mentors come in for an hour or two where they felt they would be the most useful, and others that stayed for the entire event. The time commitment is flexible and completely dependent on a mentor's schedule.

FRIDAY NIGHT - *pitching sessions and team formation*

Mentors can help present problems in the healthcare industries and work with the newly-forming teams to brainstorm solutions to those problems. This conversation will continue throughout the weekend for many teams.

SATURDAY - *hacking*

This is when mentors with technical skills will be most useful, since Saturday is when most of the main hacking is done. Mentors can help teams with their code, use of hardware, APIs, and much more.

SUNDAY - *presentations and judging*

Mentors can help teams learn how to present their projects professionally and effectively. Judging starts at 11 AM with the preliminary rounds and finishes at around 3 PM with the final rounds.

Location

MedHacks 2017 is being held at Turner Auditorium in the Ross Research Building at the Johns Hopkins Medical Campus

Parking

Parking will be provided to all judges. We will be emailing all of the mentors and judges with information about parking closer to the date of the event.

Projects

There will be three project categories at MedHacks, dictated by our title sponsors. Projects will have to fit in one of these categories, but other than that, teams are free to choose what they work on. Mentors are welcome to help teams working in any category.

- ① “Access to Care” with Blue Cross Blue Shield Association
- ② “Medication Adherence” with CVS Health
- ③ “Patient Safety and Quality” with the Armstrong Institute at Johns Hopkins Medicine

Anything Else to Do?

Absolutely. You are free to judge as well. Ask for the “MedHacks 2017 Judging Guide” if this interests you. You are also able to attend anything the entire weekend including our opening ceremony to see our two amazing keynote speakers, Dr. Peter Pronovost and Benjamin Jealous, and our closing ceremony to see who the winners are. There will be a full list of possible activities available closer to the date
